

Waste Water Treatment System Container Skid (Portable WWTS)

Waste Water Treatment System:

- Dissolved Air Flotation (DAF) System
- Continuous Sedimentation System
- Batch Filter Press System
- Biological Treatment System

Waste Water Treatment Solutions:

Treatment of Fats, Oils and Grease (FOG)
Treatment of Synthetic Organics
Treatment of Acids and Alkalis
Treatment of Toxic Materials

Committed + Compliant + Cost Efficient

Water Treatment Chemicals

Available in drum, tote and ISO-tank:

- Ferric Chloride
- Hydrated Lime
- Hydrochloric Acid
- Potassium Permanganate
- Poly Aluminium Chloride (PAC)
- Sodium Hydroxide
- Sodium Hypochlorite
- Sulphuric Acid

Process Treatment

- Precipitation
- Coagulation
- Flocculation

Engineering Solution

- Odour Reduction
- pH Control /Penstock System
- BOD/COD/TSS Reduction
- Regulatory Submission

Committed + Compliant + Cost Efficient

High Pressure Cleaning System

Efficient and Cost-Effective Cleaning Technology
Reduce operating cost by up to 80%

SPINNER HEAD SPECIFICATION -ATEX 0575 CE

Working Principal	: Self-propelled hydro-kinetic (Water driven). The Orbital Rotating Head ensures fast effective cleaning.
Working Pressure	: 140 Bar
Flow Rate	: 120 LPM (litre per minute) 20 RPM
Operating Temperature	: Suitable for temperatures up to 90°C
Materials	: AISI303 Stainless Steel body construction allows chemical cleaning solutions to be used. Head Dia : 165mm
Inlet	: 3/4" BSP Female Nozzle type : 4 x 1/4 NPT
Weight	: 6.67kg
Made In	: Italy
